

Illness and the Soul

The Relationship between Systemic Constellations and Health

International Guest Seminar with Stephan Hausner

Stephan Hausner is an experienced homeopath, osteopath, naturopathic physician and one of Europe's foremost systemic constellation facilitators. We are delighted to be offering this rare opportunity to experience his valuable and groundbreaking work integrating systemic constellations and holistic approaches to health and wellbeing.

- Dates:** 22nd and 23rd November 2008
Time: 9.30 am - 5.30 pm
Venue: The Dragon Hall, Covent Garden, London
Fee: £248.99 (£211.91 plus VAT)

Employing both the holistic and systemic paradigms Stephan will explore the origins of illness and health. This seminar will expand our understanding of the expression of symptoms and shed fresh light on how psychological and family system dynamics influence a person's disease process.

Why do particular symptoms appear? Why do certain illnesses, diseases or accidents repeat themselves within a family? Why do diseases sometimes skip a generation? How do transgenerational issues manifest as symptoms?

Stephan's approach will provide both therapists and clients with new perspectives and empowering healing resolutions.
